

Submersible Pumps

ROBUSTA 80

ROBUSTA / UNI Series

Flows to 600 gpm/ 150 m³/h

Heads to 50 m

Discharge 1 1/2" to 4" DIN or ANSI

Sealing Mech Seal Single or double

Submersible sewage pumps designed to pump sewage and dewatering applications through all phases of municipal, industrial, commercial and domestic services. From ½HP to 5HP. Available with seal chamber and quick disconnect coupling.

AFP Series

Flows to 6.000 gpm / 1300 m³/h

Heads to 28 m

Discharge 3" to 12"

Solids up to 4"

Submersible pumps designed to handle sewage with solids up to 4". Dual type 21 seals operate in an oil chamber to protect motor from moisture. Available in monovane, nonclog and vortex impellers.

Motors up to 50HP are oil filled to better disipate heat and moisture. Larger motors are air cooled with a water jacket. Pumps are available with guide rails.
